GigaHEALTH Assessment Services

Service Description

The GigaHEALTH™ Assessment Services deliver in-depth analysis and improvement recommendations for your deployed Gigamon networks in order to maximize visibility, security, and business value from the Gigamon technology investment. This includes documenting the Gigamon infrastructure and identifying any potential configuration or setup issues within the existing visibility solution. Achieve optimal performance of existing security and network tools by directing the right traffic to tools as needed to best perform their respective functions.

Features and Benefits

Service Feature	Benefits
GigaHEALTH Full Network Assessment	Includes assessment for your entire Gigamon deployment. Based on your specific needs, network size and complexity, our team will assemble and deliver a comprehensive overview and recommendations for your deployment. + Pre-Assessment Examination — Initial review of the Gigamon deployment environment. Includes a matrix of products purchased, your specific Gigamon Support related activities, and summary assessment of connected devices and tools. + Network Assessment Engagement — Full inquiry to gather information needed for the Assessment Report. Includes deployed topology, firmware/code releases deployed vs. available for upgrade options, device logs/stats, configurations and advanced feature deployment functionality. + Network Assessment Review — Deliver and interactively review the Network Assessment Report. Assessment is purchased utilizing two (2) or more GPS-PSR-GNA.
GigaHEALTH Check-Up Assessment	Includes assessment of up to 10 Gigamon devices (or 1 Cluster) within your Gigamon deployment. This assessment delivers the same components as above through one (1) GPS-PSR-GNA SKU.
GigaHEALTH Express-check Assessment	Includes assessment of up to 4 Gigamon devices (or 1 Cluster) within your Gigamon deployment. This assessment delivers a summary of components as above through one (1) GPS-PSR-GNE SKU.
