Corporate Statement: Increased U.S. Import Tariffs

Gigamon has thoroughly assessed and is prepared for the imposition of increased tariffs on goods imported into the United States. To maintain our commitment to delivering high-quality products, we are prepared to take actions to mitigate the impact of tariffs once they go into effect. Associated incremental taxes, duties, tariffs, and other government-imposed assessments, may be applied to invoices that include impacted hardware products. We are actively optimizing our supply chain and collaborating with our partners to minimize the overall impact on our customers.

Gigamon will provide regular updates, including decisions on any pricing actions to comply with the latest outcomes of U.S. trade matters.

Should you have any questions, please email tariffs@gigamon.com
